DETAILED ACTION

Claim Objections

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

The record at patent office contain only 8 claims, claims 9-13 are missing although they appear to have been submitted since BIB data states 13 original claims.

Clarification is requested.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 14-21 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,966,301 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference in claims is that applicant is now claiming liquid fuel vs gasoline liquid fuel. Liquid fuel in light of applicant's disclosure is and obvious in view of the disclosed gasoline liquid fuel. It would be obvious to now of ordinary skill in the art to substitute liquid methanol instead of the liquid gasoline since they have been shown to be interchangeable in the art.
4. Claims 22-26 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,907,866 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference in claims is that applicant is now claiming liquid fuel vs gasoline liquid fuel. Liquid fuel in light of applicant's disclosure is and obvious in view of the disclosed gasoline liquid fuel. It would be obvious to now of ordinary skill in the art to substitute liquid methanol instead of the liquid gasoline since they have been shown to be interchangeable in the art.
